### **DETAILED ACTION**

I. Rejection of claims 41,44 under 35 USC 112, 2<sup>nd</sup> will not be maintained in light of amendment filed 4/10/06. Proper antecedent basis has been provided for these claims.

II. Rejection of claims 35,36,38-59 under 35 USC 103(a) as being obvious over Murphy will be maintained in light of amendment filed 4/10/06 for reason on record and reason as follows. Applicant has amended the claims to recite "water-based". Applicant also argues that instant invention does not include oil. Applicant argues that "ethoxylated castor oil" used in instant invention is not an oil. Examiner argues that 1) the name "ethoxylated castor oil" defines "ethoxylated castor oil" as being an oil; 2) applicant provides no evidence to show "ethoxylated castor oil" is not an oil; and 3) "water-based" is new matter and does not support the original invention. See new matter rejection below.

III. New Rejection under New Matter Rejection recited below.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 35,36,38-59 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed,

had possession of the claimed invention. The term "water-based" does not occur or have description in the specification.

III. Allowable Subject Matter

Claims 37,60-70 are allowable. The prior art does not teach or suggest the instant invention comprising ethofumesate or metamitron.
